Getting Started

It is just that easy!

Searching with Google

- Every word matters. Generally, all the words you put in the query will be used.
- Search is always case insensitive. Searching for [new york times] is the same as searching for [New York Times].
- [“Tiger Woods”] looks for the phrase, [Tiger Woods] looks for the two words in one page

RSS

Why go to a website several times (a day, a week, a month) to see if the information has updated?

Now you can have it delivered to a reader, so it's like a fresh newspaper but with information that you choose to learn about!

What a (cluttered) reader looks like
